OWNED BY FARMERS

Farmers put three million dollars of their own money into this Company because they wanted better service in handling their grain than they could get without this Farmers' Company.

That is one reason for expecting satisfaction when you deal with a U.G.G. elevator. Experience shows that you do get satisfactory service.

Deliver your grain to:

The Most Amazing Quality in Chevrolet History

QUALITY in design, quality in construction, quality in appearance. Chevrolet has the quality of a leader. Chevrolet has any low-priced car possessed them to such an amazing degree—because no other manufacturer has the same combination of the quality of Chevrolet and the diversified experience, the vast resources and the matched facilities of General Motors.

Study today's Chevrolet. Mark well the aristocratic beauty of its lines—the superbly tasteful, the graceful, the bold.

Then go for a ride. Revel in the delighting sport when you "step on the gas." Delight in the smooth operation—the swift sweep of the power, the smoothness of the car, the hughe the road, the ease with which it obeys the steering wheel, the promptness with which it responds to your commands.

Here is quality expressed in terms that millions now can understand and enjoy. Here is quality displayed at New York's premiere, which rates the same as tremendous production and which demonstrate the willingness to do things with the best.

Here is a car of amazing quality . . . for everybody, everywhere.

Blended by men trained in the world's greatest tea market.

RED ROSE TEA "is good tea"

Packed in the best packet yet found for tea—Aluminum.

The High Cost of Weeds

Actual evidence of the loss in value of weed-infested farm land is shown in an extract from the report of an Inspector visiting a certain farm for loaning purposes. In his report, this Inspector says: "It is badly infested with weeds, and is the most worthless land in the neighbourhood. I have valued 1,000 lbs. less than I would if it were of this weeds."

This \$1,000 represented 12 per cent. of the value of the farm. Many inspectors would have discounted the value to an even greater extent.

The question naturally suggests itself: What, Mr. Farmer, is your weed control cost?

You may not be contemplating a sale of the land, nor considering the placing of a ban on it. For this time being the actual value of the land may be of no particular interest to you, except from a taxation standpoint. Nevertheless, the question is now the less pertinent: What is your weed control cost?

It is the cost of buying dirty seed, if it is costing you something for seedling it.

It is the cost of the weeds already there and weed themselves and that the cost of seedling can be eliminated. But you have to eat the weeds along with the grain; that costs something. You have to thresh the weeds seed, along with the grain; that costs something more. You had many pounds of seed along with the grain to the elevator, more cost.

You pay extra freight to get the grain to the elevator, extra freight on the seed seed, as well as on the grain, extra cost. Finally, you pay to have the seed cleaned from the grain; added cost.

These are direct outlays. Have you ever taken time to figure up these costs? Their total would surprise you. And, by the way, buying these extra costs, what sum of money do you think you are losing?

But, apart from these direct costs, what was the total of the secret cost of your annual weed crop? How much life and equipment did those weeds extract from your land? How much moisture did they consume which would have given additional strength to your grain? How many extra bushels of wheat or oats or other grain per acre would you have received from your land if you had not been plagued with weeds? And, the cost of an unnecessary mixture of grain and weed seeds?

But, you argue, there is another side to the weed account in your farm ledger. It costs something to get rid of weeds and to keep land free of them perfectly true. And if you have permitted your land to become badly infested, the initial cost of weed eradication will be heavy. In fact, you may have had to pay a heavy price to get it cleaned up. This will be more than to make a single extra payment. It is well to remember, however, that year by year the weeds will become more numerous and the grain smaller and smaller.

Then, too, the day may come when you will want to sell the farm, and you will find that weed-infested farm lands few buyers and a low price.

Furthermore, it is safe to predict that if you continue to grow weeds, and thereby automatically reduce your grain yield, the time is coming when you will be forced to apply to a Company for a loan. Then Mr. Inspector will report that he values your land at from 10 to 20 per cent. less than he otherwise would have done.

It is the cost of seed, and the least conservative crop any farmer can raise is a crop of weeds; yet thousands of Western farmers are engaged in this losing business. Why? Because they have never taken the time to reckon up the cost, or because of shirklessness, or, downright laziness. Poor old ignorance is the cause, the farmer failing to realize that allowing weeds to grow and multiply is a waste of time and effort for himself. In the long run, as is involved in fighting them, while the cost of growing weeds is many times greater than the cost of eradicating them.

And if the cost and loss to the individual farmer is so great, it is, in the aggregate, to the municipality, the province, and the Dominion so enormous as to stagger the imagination.

Now, Woods and the world fight fire. Fight even harder, because you can't insure property against fire but not against weeds. The only insurance against weeds must be provided by your own hand. It will prove one of the best paying of all your farm efforts.

Testing Ability To Go Without Sleeping

Aviators at Camp Borden Better Record of Lindbergh

Canadian Air Force aviators at Camp Borden have been undergoing tests to determine their ability to go without sleep. It is understood that several bettered the record of Colonel Charles A. Lindbergh, when he remained awake for 48 hours, and the record of the late Lieut. James D. Harting, former Queen's and Camp Borden rugby player, remained awake and active on duty for more than 48 hours. That is, it is said, he lay down to read a magazine and, forgetting the contest, dozed off in mid-afternoon.

Minard's Liniment for warts and Pimples

Some people are so insipidous that they don't even entertain ideas of their own.

Charming Reflection is obtained by using Cuticura Soap

Daily, assisted by Cuticura Ointment when required. It keeps the pores active, the skin clear and free from wrinkles, and the skin in a state of healthy growing condition.

Each Box of Minard's Liniment contains a tube of Cuticura Shaving Stick 25c.

England Is Founding New Naval Museum

Valuable Exhibits Have Been Handed Over By Admiralty

A National Naval and Nautical museum, the first of its kind in England, has been founded at Queen's House, Greenwich.

A magnificent start has been given to the new venture by the Lords Commissioners of the Admiralty, who will hand over the entire contents of the Royal Naval Museum, including:

The Chatham chest, dating back to the Armada.

Drake's astrolabe.

Compass and dipping needles of Captain Cook.

The Franklin relics.

The Model of the Battle of Trafalgar.

Uniforms of Sir Charles Napier.

Medals and Naval relics.

Actual size models of British battleships from 1670 to 1750.

Nelson's relics and other treasures in the Painted Hall.

There will also be a collection of ships of sailing date from the year 1500 to the middle of the XVII century; a series unequalled in any other country, and model will illustrate the progress of naval construction from the Devastation to the Dreadnought.

Nelson's relics and other treasures in the Painted Hall.

There will also be a collection of ships of sailing date from the year 1500 to the middle of the XVII century; a series unequalled in any other country, and model will illustrate the progress of naval construction from the Devastation to the Dreadnought.

ANSWERS TO LAST WEEK'S QUESTIONS

197. How Does the Lightning Bug Get Its Light?

The lightning bug (firefly) is a small beetle which in its adult state is winged; is nocturnal in habit, and during the day usually concealed in dark places. The luminous organs are beneath the skin at the rear of the abdomen, and consist of a specialized part of the fat-body covered by transparent spots. The light is intermittent and appears to be under control of the insect's nervous system, and there is a regular time progression involving a special enzyme in the blood and a special enzyme secreted by the cells of the organ. Inhabitants of tropical America sometimes obtain light by keeping fireflies in small cages.

198. How Long Do Different Animals Live?

Large animals live longer than small ones as whale, elephant, camel, horse, deer, rabbit, moose, Rat and mice live 5 years; moose 7 to 30; cat 10 to 18; sheep 12 to 20; deer 15 to 20; bear 15 to 25; bat 20; horse 20 to 50; lion, tiger, bear 25 to 40; hog 25; camel 50 to 80; elephant 100 to 150; crocodile 300; tortoise 350; whale 400. Wren 3; swif 8; robin, blackbird 12; chicken 12 to 15; pigeon 20; lark, canary, goldfinch, wren, 25; goldfinch, doves, 40; sparrow, 40; sparrow, 50; parrot 80; raven, owl, eagle, falcon 100. Salmon 100; pike 150. Fish and reptiles live longer than birds, and mammals.

199. Where Do We Get Our Ice?

All ice used south of Philadelphia is manufactured. Some, but even there much ice is machine made. Fifty years ago there were three ice plants in the United States and there are 5,000 with an annual output of 40 million tons, valued at 200 million dollars; while thousands of hotels, stores, restaurants, etc., have small plants of their own; and now we have the small domestic size refrigerating outfit for use in every home where electric current is available.

200. How Is Artificial Ice Made?

The freezing is accomplished by immersing cans holding 300 to 400 lbs. of water in a brine bath at a temperature of 14 to 20 degrees by means of ammonia pipes which pass between the cans in the brine. 30 to 45 minutes are required for the freezing to be made when boiling is changing to gas absorbs heat, the boiling temperature depending on the air pressure. Liquid ammonia enters the pipes, which are kept at low pressure, where it boils and in doing so absorbs the required heat from the cans. A fan is used. A denser changes the ammonia back to a liquid, so it can be used continuously. Compressed air blown into the water during the freezing process makes it clear and solid.

201. Does Education Yield a Financial Return?

Thirty-one persons out of five

million with no schooling attain distinction in their work; with elementary schooling 808 out of three million achieve some distinction above 2,000 out of two million rise above the average in accomplishment; with a college education more than 5,000 out of one million enter notable service. In other words, the college graduate has ten times the chance that the high school graduate has, 22 times better chance than he taking only the elementary courses, and 80 times as much chance as he without schooling.

202. How Much Is a Carload?

Generally speaking means a minimum of 15,000 to 40,000 lbs. The standard freight car holds 60,000 lbs.; there are many cars carrying 80,000, 100,000 lbs. in a car. Average freight car holds 20,000 lbs. Average American freight car is three times the size of those used in Europe. Much American traffic is in carload and trainload lots hundreds of miles. This reduces carrying charges. From Dakota to seaboard is 1,500 miles, little less than Paris to Petrograd, Pittsburgh to New York 450 miles—25 times distance London to Liverpool; Chicago to New York equals Paris to Warsaw or Berlin to Rome. New York to Frisco is 3,191 miles.

203. What Is a Ton Mile?

Transportation is measured in passengers and tons carried one mile. U. S. passenger miles in 1924 were 36,400 millions (equivalent to 36,400,000 passengers each one mile); freight miles 392 thousand millions. Passenger miles per mile of road 153,618; average revenue per passenger mile 2,985 cents; two miles per mile of road 1,518,556; average revenue per ton mile 1.12 cents. Average distance traveled per ton of freight in the U. S. 325 miles, in Germany 64, France 77, Italy 70. English rates per ton mile are double those of the U. S.; in Germany and France about a half greater.

BOY SCOUTS IN CAMP

The Boy Scout troop have not been experiencing very pleasant weather for their camping trip. John Muller, Harry Rompau, William Hagerman, Frank Taittinger, Roy Amundsen, and Bertie Hilditch, the following have passed the Tenderfoot Badge test: John Muller, Harmon Rompau, William Hagerman, Frank Taittinger, Roy Amundsen, and Bertie Hilditch.

The following promotions have been made:

Patrol Leader D. MacKenzie to Troop Leader.

"Second" C. MacKenzie to Patrol Leader Wolf Patrol.

John T. Torbit to "Second" Wolf Patrol.

Scout Moffatt to Patrol Leader Bulldog Patrol.

Scout H. Atkinson to "Second" Bulldog Patrol.

It was unfortunate that the road to the camp was not made available from attending the investiture of tendertoof and troop inspection held at the camp last Wednesday afternoon and the troop wishes to take this occasion to thank most heartily all those who contributed in any way to the success of the camp by the loan of tents and other equipment, without which the camp could not have been held.

Claresholm Beats Calgary Athletics in League Game

Calgary, Aug. 13—Home runs by Tim Thompson and Oszust featured Claresholm's 4 to 1 victory over the Athletics in an Alberta Southern Baseball League game at Mewata Park here yesterday. Thompson drove the ball to keep sharp in the circuit with a double in the first inning. Oszust lined the ball to left center to keep sharp in the fourth inning. Oszust scored for the circuit with a double in the fifth inning. Dodger Lewis hurled a fine game for the visitors and was well supported, particularly by Catcher Charlie Taylor, who did some throwing.

The Athletics played Paul Thompson of the High River club in left field. Play was stopped at the end of the seventh in-

UNVEILING OF NANTON WAR MEMORIAL

In spite of threatening clouds the unveiling of the Nanton war memorial was not attended by the rain last Saturday afternoon. Bz. all. Two performances daily, before the actual ceremony. Lord tenor 2 o'clock, night 8 o'clock.

Great Pier Dedicated to Empire Service

1. New C.P.R. Pier at Vancouver.

2. Bronze plaque unveiled by Mayor Taylor of Vancouver.

On a notable feature of Greater Vancouver's celebration of the Diamond Jubilee of Confederation—out of the 100 other cities in the Dominion to have a war memorial, Vancouver's is the only one which was the dedication and official opening of \$6,000,000 Canadian Pacific Pier B.

The new mammoth pier is the second longest in the world, and will be used for the Canadian Pacific's future when Vancouver will be used as a port of entry for the great Pacific coast, and designed to accommodate at least two of the greatest ocean liners.

It is a far cry from the first wooden ocean docks built by the Canadian Pacific in 1887 when Vancouver was a city of stumps and possibilities to the present pier, which offers 1,140 feet of berthing space available and accommodation for the cargoes of a dozen or even the most modern ocean grey-

Haddington inspected the veterans and this was followed by the singing of "O Canada" and "The Maple Leaf" by the local band. The Rev. W. H. Hargreaves, the praver of dedication and Lord Haddington unveiled the memorial which was of Italian marble in the form of a soldier with arms reversed. The 13 year old daughter of a Nanton man who was killed in the war, laid the first wreath at the foot of the monument and the ceremony was completed with speeches by Lord Haddington and the Nanton and the singing of God Save the King.

Messrs. Ballachey, Burnet & Spankie, of High River, solicitors for the Calgary Power Company Limited, received advice by wire to the effect that Mr. Stewart, Minister of Lands and Forests, had now finally approved the disputed right of way plans from Claresholm south and has confirmed his approval, previously given, of the plan of the disputed portion of the right of way between Parkland and Claresholm. The latter plan has already been registered and the plans which have now received his approval were sent forward from Ottawa to Calgary on Tuesday. Under Section 7 of The Water Powers Act when the Minister has approved the plans the company has all the powers of expropriation which are enjoyed by a railway company.

It is understood that the company is making one more effort to arrive at an amicable arrangement with the owners who have objected to the granting of easements before proceeding to exercise its legal powers under the Act.

There is always rubbish in the air," says a scientist. Yes, but you're not obliged to listen to it.

Rev. A. H. Eggleston, B.A., Minister,

Must Protect Forest Resources

If Current Annual Revenue Is To Be Perpetual

At what rate are Canada's forest resources being depleted? This question is asked and answered by a bulletin recently issued by the Canadian Pacific Railway. In meteoric manner the pulp and paper industry has risen to be the Dominion's leading manufacturing industry in point of value of production, and the consumption of raw material, the export of unmanufactured wood in many forms is increasing each year as the demand from established markets grows and new ones are developed. All this means an increasing drain upon Canada's forest resources, while, although, no one has any means limitless or inviolate. An estimate of the total annual forest production of Canada for 1925 has been made by the Forest Products Branch of the Dominion Bureau of Statistics, this including all lumber and naval material, Canadian forests during the year, and, observing the rate at which Canadian forest resources are being exploited.

The total value of primary forest production in Canada in 1925, according to this estimate, was \$75,264,000, as compared with \$31,146,710 in 1921, \$19,745,231 in 1923, \$17,920,996 in 1922, and \$16,054,021 in 1924.

The Dominion Government and the Canadian provinces all the former provinces have policies of reseeding tree planting which are going a greater way each year in meeting the annual destruction.

In 1925 the Dominion Government planted 1,000,000 trees of the four species with trees and 229 acres with seed. Ontario has just introduced a new reforestation policy in which the co-operation of the municipalities and farmers is enlisted, the setting aside of land for the purpose, and the Government providing the trees.

Canada's forests constitute one of the greatest natural resources, and, although, remaining at the present time a great annual resource, which it is intended shall be perpetual. Demands for raw materials from countries which have exhausted their own resources are so great that the demand for forest products, without the transference of forest possession, without adequate protection. Measures for combating the forest's enemies are becoming more extensive and effective each year, and, reforestation is constantly changing a larger extent of the areas depredated through commercial operations."

Question Easily Answered

Comparatively Few Would Care To Go Back to "Good Old Days."

How few there were twenty-four years ago who thought of owning an automobile. Today, however, few there are who do not lead drivers' lives.

Are we ever thankful that woman would be shorn of her long tresses, alleged to be her beauty and crown of glory?

The man who thought we would fly through the air was considered ready for the asylum. Now, flying is an ordinary event in our lives.

That nations would be desirous only to secure peace to the world rather than to bring war on was but little thought of.

"We little thought that some of our finest fabrics for clothing would be made from trees and sold as silk.

We little thought that the eastern Canadian would become the biggest grainary in the world, feeding millions of its population.

Who would have said that Alberta would be one of the most extensive coal and oil fields in the world, and Saskatchewan the most extensive grain fields?

How much time was spent on sport of all kinds as compared with today. The automobile is more popular and richer in every way by comparison? Is there anyone who would care to go back to "those good old days?" — Moose Jaw Times.

Where Only Faith Can Tread.

Everything is taken on faith. No one fully understands the working of the telephone, but everyone uses it. If they are going to be kept from doing one thing, we may not care about it. I feel honest sympathy for those people whose analytical minds prevent them from adhering to the Christian religion. They are bringing analysis in where only faith can tread. — From The Musical Observer.

Fifth Passenger (exacted): "Can you tell me where to find the ship's doctor?"

Second Passenger (getting excited also): "No, I can't. But what's the water like with the ship?"

Cattle are being killed by electrocution in modern slaughter houses.

Not Anxious For Trouble

Russian Dictators Know Better Than To Start War

It may be true that Russia is preparing for war, but that is no sign that she wants to start a conflict. She is not prepared for war, but, though, they are scarcely as crazy as that. She cannot attack one of her neighbors without bringing most of Europe into her host. She has no right to speak of her own strength, but is not equipped to cope with that of a first-class power. Moreover, it is needed for police purposes. If it were with drawn from Georgia, Azerbaijan and Armenia, the Russian Government would be in a difficult position. Essentially, Russia is not prepared for war; her factories could not turn out munitions in necessary quantities, and there would be no ships to transport them. There have been many indications that these results are planned by the dictators of Russia. They could have found plenty of excuses for war if they wanted to start it. After all, they have not wanted to fight. But the have not dared even to pick on such a weak country as Rumania. No doubt they fear that a war of any duration would bring on a retribution that would cost them.

Windbreaks For Orchards

Permanent Shelter Belt of White Spruce Is Best Protection.

In many parts of the prairie provinces windbreaks are necessary for the protection of fruit trees. In exposed areas, subjected to severe wind storms, the establishment of windbreaks is an absolute necessity.

The cost of making these windbreaks

is high, but the results are well worth the cost.

Windbreaks are to be recommended

for the following reasons:

1. They are permanent.

2. They are effective.

3. They are not expensive.

4. They are easily maintained.

5. They are not difficult to make.

6. They are not difficult to maintain.

7. They are not difficult to remove.

8. They are not difficult to repair.

9. They are not difficult to renew.

10. They are not difficult to replace.

11. They are not difficult to renew.

12. They are not difficult to renew.

THE WALL OF CHINA

In 214 B.C., the Chinese commenced building the Great Wall, which isolated their country from the rest of the world and helped retard their national progress.

The business man who maintains a wall of "dignified reserve" towards the buying public is just as surely retarding his own business growth.

LOTS OF LOW-PRICED TIRES — And OURS are GOODYEARS

SOME of our good friends went elsewhere for tires when rubber was high. They had to have low price and we couldn't give them both low price and Goodyear quality.

TOWN COUNCIL MEETING

A town council meeting was held on Thursday evening, the following officers being present: Mayor Ringrose, Councillors Maxwell, Arneston, Wyatt, Gately and Remeker.

Mr. Knight interviewed the council on behalf of the Rink Association and asked the council to consider concluding the present lease of the hall at the other sites in the town from which the members of the rink committee might choose a definite site. After some discussion Mr. Knight was informed that this parcel of land had been promised to Mr. Hugh of Calgary on which to build a \$50,000 dollar steam laundry and that therefore the property was not available as a rink site.

It was resolved that a donation of \$50 should be made to the Baseball Club.

The mayor and secretary were authorized to sign on behalf of the town a bill of sale in favor of the Calgary Power Company Ltd., to convey to the latter the electric which they purchased in connection with the electric lighting system.

A letter was read from the City Board in which the Board sanctioned the town using \$7,000 out of the \$30,000 received from the the Calgary Power Company to retire an engine note of \$700 due to the town. The amount is an approximate sum of \$5,000, the remaining \$2,000 to be used in the purchase of an automatic pump for the water reservoir.

A letter was read from J. D. Robertson, Deputy Minister of Public Works, Edmonton, in which he outlined the government's policy in connection with the main highway passing through the town, the conditions being as follows:

1. That the town should grade and graveling according to certain standards, the work being under government supervision.

2. That the town should pay the entire cost at the completion of such work, the Provincial Government reimbursing the town with 50 per cent of such cost within one year.

3. That the government engineer should be at the service of the town without cost.

The secretary was instructed to inform Mr. Robertson that these conditions were acceptable and that the government engineers would commence to lay down details of construction, cost, and the like.

Accounts as signed by the chairman of the finance committee and enumerated on a list totaling \$2,343.20 were passed for payment.

Departmental Examinations

The following are to results of the Departmental examinations for the Claresholm High School and Grade VIII.

Grade XII—Passed clear, 2. Failed in one subject, 3. Failed in three subjects, 2. Failed, 1.

Grade XI—Passed clear, 5.

Failed in one subject, 3. Failed in three subjects, 2. Failed in four subjects, 1.

Grade X—Passed clear, 8.

Failed in one subject, 3. Failed in three subjects, 6. Failed in four subjects, 11.

Grade VIII—Passed, 28. Failed 4.

An analysis of the marks of the candidates, showing the percentages of passes in the various subjects of the different grades of the High School give the following results:

Grade XII—Literature, 80 per cent; Composition, 4, 83-1-3; History, 4, 77-1-3; Algebra, 3, 66-2-3; Geometry, 3, 83-2-3; Trigonometry, 40; Physics, 40.

Grade XI—Literature, 3, 84-7; Composition, 3, 66-2-3; History, 3, 77-2; Arithmetic, 3, 64-5; Geography, 8-18; Agriculture, 2, 86-6; Chemistry, 53-37.

Grade X—Literature, 2, 40-0.

Grade VIII—Literature, 2, 40-0.

Composition, 2, 95-3; History, 2, 77-2; Physics, 1, 93-5; Agriculture 1, 42; Algebra, 1, 64; Latin, 1, 80; Grade IX—Literature, 1, 80-5; Composition, 1, 85; History, 1, 38; Algebra, 1, 63-9; Geometry, 1, 59; General Science, 68-3.

Grade VII—85 per cent.

Composition, 2, 95-3; History, 2, 77-2; Physics, 1, 93-5; Agriculture 1, 42; Algebra, 1, 64; Latin, 1, 80; Grade IX—Literature, 1, 80-5; Composition, 1, 85; History, 1, 38; Algebra, 1, 63-9; Geometry, 1, 59; General Science, 68-3.

Grade VIII—85 per cent.

ALBERTA CROP REPORT

Issued by the Department of Agriculture, Government of Alberta.

Edmonton, Aug. 13.—The present season has been almost ideal for the growth of crops, the weather during the past two weeks being particularly favorable for sowing and ripening period, according to reports reaching the Department of Agriculture. Early varieties of wheat on lighter land has been made with the harvesting of this grain in a number of districts having a higher yield, while in some cases barley has also been cut, and with a continuation of the present favorable weather harvest promises to be fairly general in from ten days to two weeks. Some frost damage has been reported in the northern prairie, and there is every indication that one of the greatest crops in the history of Alberta is well on its way to maturity.

The Dominion Bureau of Statistics in a report issued during the past week says a marked increase in the average yield of the five principal grains in Alberta this season as compared with 1926, and with the decidedly higher yield which is promised, the total production of grain in the province for 1927 undoubtedly will show an increase of several million bushels over last year's mark.

In the south and southeastern parts of the province a start has been made with the cutting of fall wheat and some excellent yields are reported, the acreage in this section having increased 25 per cent than has been the case for the past several years. Harvesting of rye has been practically completed and threshing of this grain has started a number of districts. The weather in this part of the province has been dry, but with very little damage from frost, wind, or rain. The reserves of moisture in the soil and the straw is sufficient to enable the grain to fill satisfactorily.

In the central and northern section of the province all grains are being harvested and yields are high and have started in early-sown wheat fields in a number of districts. A heavy crop of hay is being put up and pastures generally show little effect of the recent dry weather. Livestock throughout the province is in excellent condition and the quality of the feed and the quality of the finished beef is promised for market at an earlier date than usual.

Harvesting has started in a number of localities in the Peace River and Grande Prairie districts. A light sowing and yield of the cereals have been followed by a marked increase in the output of grain from this part of the province for the present season.

The Low-Swung Body with no loss of headroom or road clearance

THE dream of every automobile manufacturer is to build a body low for beauty and for roadability without loss of head-room or road-clearance—has become reality in McLaughlin-Buick for 1928.

McLaughlin-Buick engineers achieved this lower effect, not by the makeshift of smaller wheels with their increased tire wear, but by a complete re-designing of bodies, and by an entirely new system of suspension, the double-drop frame. The tallest McLaughlin-Buick now stands but 70 inches high, yet McLaughlin bodies are roomier than ever before.

See the low-slung body as McLaughlin-Buick builds it, and you will see at once why McLaughlin-Buick is the industry's accepted leader in beauty, luxury, performance—and especially in value.
